

Longmont Amateur Radio Club

March 2022 General Meeting

March 16, 2022

President Chuck (K0ITP) started the meeting at 7 PM after a nice social group session that started at 6:30. Chuck announced that LARC Fest is on and will occur on April 2 at the Boulder County Fairgrounds. This was a wonderful announcement and helps the Club get back to normal. Chuck also announced the Frozen Dead Guy Festival will be held on Nederland this next weekend (March 19). It should be a fun event and everyone is invited to participate.

The evening presentation was given by Jack Roland (KE0VH), who has developed Sky Link with some technical help from a couple of developers. Sky Link uses the internet to connect repeaters all over Colorado and beyond, including some international repeaters. It was a very interesting presentation and showed how anyone can connect with repeaters far beyond your local area. Sky Link has a call sign, N2SKY. More information can be found at www.skylinkhub.com
