

BARCfest RADIO TEST TABLE

Jim Andrews (KH6HTV)

The Boulder Amateur Radio Club is offering a **FREE** radio testing service at it's upcoming BARCfest.

We offer to test any rig up to a 100 watt max. limit for HF up to 70cm. We will test your rig for

1. Transmitter Power Output
2. Transmitter Spectrum
3. Receiver Sensitivity
4. DC current draw at 13.8Vdc

We will have the following test equipment available to perform these tests:

1. 150 Watt, 40dB attenuator as dummy load
2. Rigol DSA-815, 1.5 GHz, Spectrum Analyzer
3. Hewlett-Packard 8640B, 512 MHz, Signal Generator
4. Power-Werx SPS-30DM, 13.8Vdc, 30 Amp Power Supply with digital meters
